

Goal connect

COMPANY PROFILE

A large, diagonal photograph of Earth from space, showing the blue atmosphere and white clouds over a brownish landmass. The image is split diagonally from the top-left to the bottom-right, with the top-left portion being white and the bottom-right portion being the space image.

**NEW MULTIPLICATION
OF THE ENERGY**

NEW MULTIPLICATION OF THE ENERGY

VISION

JAPONISM × COSMO POLITANISM

Even though Japan is one of the leading countries in the world when it comes to energy consumption, energy self-sufficiency is only a few percent.

- Electrification, the change to electricity from resources like gasoline and gas.
- Decentralization, the way to supply stable and efficiently.
- Renewables, one of the ways to stop climate change, and conserve our environment.

“Energy is something to use constantly”, that’s a phrase from the past, an expansive revolution, evolution, development (battery · generator) is on the horizon.

To link together energy and Japan, electricity and livelihood, ideal and reality, to become a helpful source.

To create new values by multiplying the view point of Japan, Japonism, with the view point of the world, Cosmopolitanism.

Goal connect with its own experience in visualization and system development, provides innovations in order to create a resource circular economy, by connecting the goals of businesses in the view point of energy.

PROFILE

Representative

AKIRA OSHITA

He studied architecture in university which lead him to think about becoming a bridge between architecture and electric power. He engaged in the business of distributed energy resources by dealing with industrial and business oriented power generators like cogenerators, etc.

He was also involved in operation improvement solutions. He had ideas regarding the use of energy data in energy management (BEMS) involving multiply resources, and also the adjustment and control of power. He also worked in electricity retailing.

His vision evolved during the years, he has a goal to become a bridge between electrification, decentralization and the spread of renewables. In Goal connect which has virtual power plants as his core business, he creates new platforms to improve the speed and quality of resource management and development of its partner companies.

COMPANY

Overview

Name	Goal connect Co., Ltd.
Location	Shimbashi Enter Building, 5F, 5-8-11, Shimbashi, Minato-ku, Tokyo, 105-0004, Japan
Representative	Akira Oshita
Established	12th of December, 2018
Capital	15,000,000JPY
Core activities	<ul style="list-style-type: none"> ● Projects related to virtual power plants ● Support of aggregation coordinators or resource aggregators ● Solution development regarding energy sharing

SERVICE

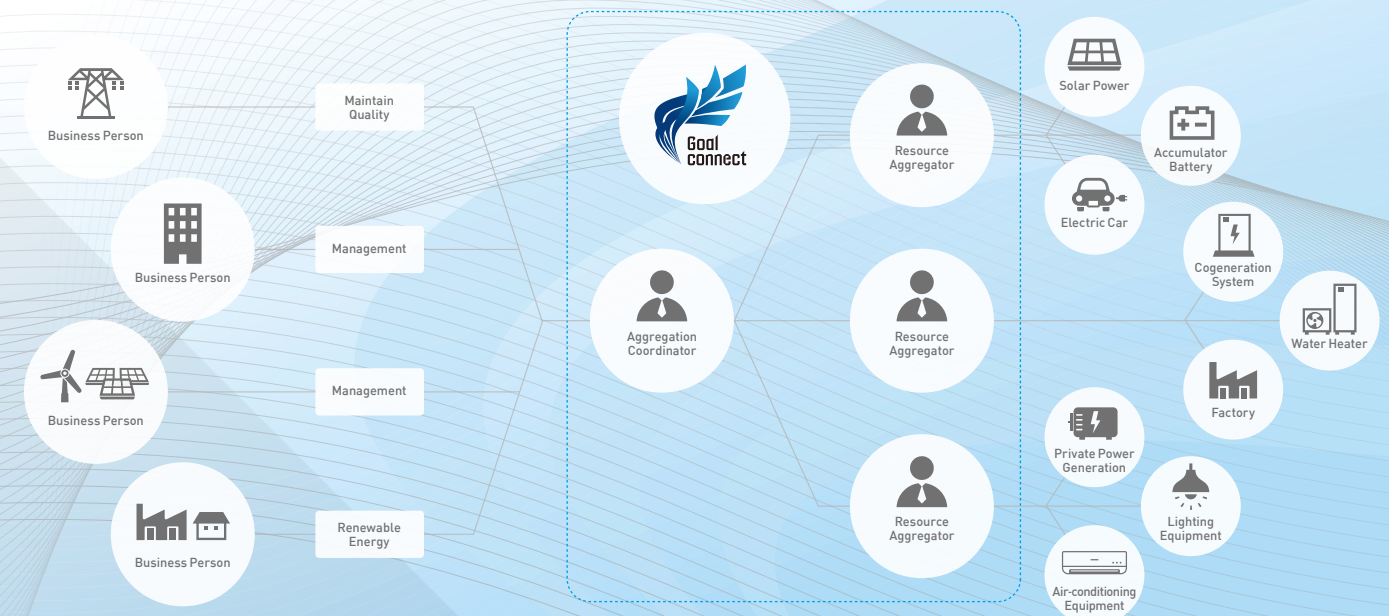

AGGREGATION COORDINATION

We support a new structure and value system by aggregating and connecting resources

The current trends show that it is time to reconstruct the old structures and systems in all kinds of fields in order to meet the needs of the changes of the new era.

Electric power, that is indispensable not only in businesses, but in all areas of our lives, is approaching a crossroad that will determine our future.

Goal connect aims to be a driving force in order to connect business to achieve their goals that were impossible to reach so far, by making use of its experiences and management skills in the electricity business.
